Experience

Full Stack Web Developer

Inspired Web Design

April 2016 - Current

- Confer with clients to discuss and determine layout design.
- Analyze user needs to determine technical requirements
- Design, build or maintain web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Review final layouts and suggest improvements as needed.
- Identify problems uncovered by testing or customer feedback, and correct problems.
- Collaborate with management or users to develop eCommerce strategies and to integrate these strategies with websites.
- Evaluate code to ensure that it is valid, is properly structured, meet industry standards and is compatible with browsers, devices, or operating systems.
- Backup files from websites to local directories for instant recovery in case of problems.
- Develop databases that support web applications and websites.
- Install and configure hypertext transfer protocol (HTTP) servers and Associated operating systems.
- Develop and validate test routines and schedules to ensure that test cases mimic external interfaces and address all browser and device types.
- Register websites with the search engines to increase website traffic.
